

# CISB Science Day

March 27<sup>th</sup> 2006

## Program

**Presentations will be held in the CIBB seminar room**

**14:00 Virginie Garlatti** IBS

Functions of Collectins in engulfment of apoptotic cells.

**14:15 Susana Teixeira** ILL

DNA/drug complexes: structural studies at the ILL Dlab.

**14:30 Virgile Adam** ESRF/IBS

Coupled spectroscopic/crystallographic studies of Eos Fluorescent Protein.

**14:45 Elin Moe** ESRF

Structure/function studies of DNA glycosylases from the radiation resistant bacteria *Deinococcus radiodurans*.

**15:00 Gael Seroul** EMBL

The Protein Information Management Project.

**15:15 Nicholas Tarbouriech** IVMS

Structure of the Epstein Barr virus oncogene BARF1.

**15:30 Guy Schoen** IVMS

EM for structural biology in the CISB.

**16:00 Pot at the CIBB coffee room**
